RE: Business Activity Survey

The Town of Slave Lake asks for your company's participation completing the Business Activity Survey. It is a comprehensive survey that asks detailed questions about product and commodity flow to and from your business, so the survey is best filled out by a manager or owner.

Because it is an in-depth survey, there are four table questions included in the survey. Should you have issues viewing these questions on your device, I have attached a form document that you can complete, save and upload into the survey. Should you experience any difficulties, please contact me at (780) 843-5957.

The survey will be open for approximately three (3) weeks and we will use the aggregate findings to identify economic development opportunities for the area.

Your participation is extremely important, so I encourage you to take time completing the survey. The results will develop future economic directions and policy.

Thank you in advance for your participation.
